RE: Acceptance, Closure Summary Report for Closure of RCRA Container Storage Unit 20 in Building 664

Dear Mr. Legare and Mr. Nesta:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division") has received the subject report transmitted on October 28, 2004. The transmittal letter indicates that closure was pursuant to Part X-Closure of the Site's 1997 State RCRA Permit. The Division agrees that a Closure Description Document for the unit was submitted and approved under the prior permit. Actual closure activities were performed under the current State RCRA Permit, specifically permit number CO-04-06-23-01, effective July 23, 2004.

The Division accepts the Closure Summary Report and the certification that the secondary containment pans met the "clean debris surface" performance standard. Although not specifically required, the certification by a Colorado Registered Professional Engineer is exemplary in documenting that the decontamination and inspection requirements were met.

As noted in the Division's August 23, 2004 letter approving administrative closure of the units, i.e. the floors of Building 664, visual or instrumental evidence was necessary to confirm that releases from any pan to the floor had not occurred. The result of the pre-demolition survey of the building provided sufficient evidence. The closure of Unit 20, in its entirety, is now complete.

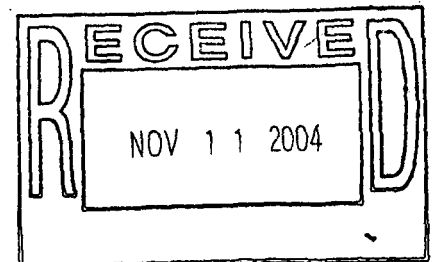

If you have any questions concerning this correspondence, please contact me at 303-692-3367 or Harlen Ainscough at (303) 692-3337.

Sincerely,

Steven H. Gunderson
